about me

I am nearing completion of a design and commerce conjoint degree from Victoria University of Wellington, majoring in Media Design and Information Systems respectively. My uni study is set to wrap up by July 2020 and I am seeking my first role in the field of design. My university grades have been strong, evidenced by my inclusion on the Victoria University Dean's List for both the Faculty of Architecture and Design, and the Victoria Business School in 2018. I am a self-motivated, dedicated worker, and I put my all into every project I undertake. I am passionate, reliable, patient, and a kind person.

My passions lie in creating art and music, and I have always been highly interested in film and technology. I have posted numerous animations and short films online, dating back to my intermediate school days. In my spare time I enjoy fishing with my Dad, camping, and travelling.

I am a keen and skilled computer user which has been highly applicable to both my degrees. I pick up new interfaces and software intuitively and quickly, and have experience in coding HTML, CSS, Javascript & SQLite. I am familiar with MS office suite, and a user of both MacOS and Windows operating systems. My Media Design studies at Victoria have included graphic design, web design, illustration, 2D animation, stop-motion, as well as video design and editing. I am a competent and experienced user of the Adobe suite of applications.

During my time as a university student I have done various part-time jobs including flipping burgers, cleaning at a pet groomers, commercial painting, security at Centre Port, and packing shelves at Countdown in Karori. I am a reliable hard worker.
