ABOUT ME

I recently finished studying a media design and commerce conjoint degree from Victoria University of Wellington, majoring in Media Design and Information Systems respectively, and am seeking employment in the field of design. My university grades have been strong, evidenced by my inclusion on the Victoria University Dean's List for both the Faculty of Architecture and Design, and the Victoria Business School in 2018. I am a self-motivated, dedicated worker, and I put my all into every project I undertake. I am passionate, reliable, patient, and a kind person.

My passions lie in creating art and music, and I have always been highly interested in film and technology. I have posted numerous animations and short films online, dating back to my primary school days. In my spare time I enjoy writing music, watching movies, and spending time with friends.

I am a keen and skilled computer user which has been highly applicable to both my degrees. I pick up new interfaces and software intuitively and quickly, and have experience in coding HTML, CSS, Javascript & SQLite. I am familiar with MS office suite, and a user of both MacOS and Windows operating systems. My Media Design studies at Victoria have covered a variety of mediums which include graphic design, web design, with a specialisation in video design and animation. I am a competent and experienced user of the Adobe suite of applications.

Since this year I have been working in the freelance design space, providing graphic design, video editing and animation to various companies. I have also had experience with a variety of part time jobs during my term at university, as evidenced in my work experience section. I am a reliable hard worker.
